

CSCI COURSES

Courses

CSCI 1301. Computer Science I. 4-0-4 Units.

CSCI 1301 is an introduction to computer science with coverage of algorithmic foundations, hardware concepts, and introductory programming in Java. Specific topics include data storage, data manipulation, and data abstractions. Programming concepts covered are algorithm design, primitive data types, and expressions, loops, modular programming, conditional execution, program logic, and arrays.

Prerequisites: MATH 1111.

CSCI 1301K. Computer Science I. 4-0-4 Units.
